COP21 Special: Know more about climate change

30 November 2015 || To: NUS Community

Starting from today, the Paris UN climate conference (or UNFCCC's COP21*) is bringing together 196 countries in an attempt to deliver a new universal climate change agreement.

NUS is accredited as a Research and Independent NGO with the UNFCCC where its representatives can participate in the COP21 meetings. While not all of us can attend COP21, we can do our part. Let's start by understanding climate change better and Singapore's involvement in tackling it.
