

The Case for Circular Economy in Singapore and Beyond

A public seminar

9.30 am - 12.30 pm, 26 August, 2017 (Saturday)
Shaw Foundation Alumni House Auditorium

In an increasing consumer-driven society, there is a need for a regenerative system to minimize resource input and waste, emission, and energy usage. This could be achieved by narrowing material and energy loops. In this regard, the concept of Circular Economy shows high potential for business and governance.

The M. Sc. (Environmental Management) [MEM] Alumni of NUS is organizing a public seminar on Circular Economy. The seminar will focus on how Singapore and other regions are addressing resource related issues; the challenges they face; and effective ways to overcome those challenges.

Join us for an informative session with experts and participate in a highly engaging panel session.

*Due to limited seating please register early at:
