

Walking Workshops || Exploring Urban Nature

22 February 2017 || TO NUS Community

Can farming be done in the city?

Amidst all the free-floating interest in urban farming and the possibilities of growing our own food, here's an opportunity to take a walk around neighbourhoods near and far to talk to the people who tend to gardens. Can farming be done in the city? What sorts of nature can we find or create in our home, public or shared spaces? Join a Foodscape Collective's Walking Workshop to find out! There are several Workshops available, including one at NUS on 26 April!

Walking Workshops
EXPLORING URBAN NATURE
With **FOODSCAPE**
collective

CAN FARMING BE DONE IN THE CITY?

Amidst all the free-floating interest in urban farming and the possibilities of growing our own food, we take a walk around neighbourhoods far and near to talk to the people who tend to gardens. Can Farming be done in the City? What sorts of nature can we find or create in our home, public or shared spaces? Come on our Walking Workshop to find out!

EACH SESSION: 5-15 PARTICIPANTS
DETAILS/REGISTER: TINY.CC/W-WORKSHOPS
/ RSVP huiying.n@u.nus.edu
MORE LIKE THIS ON FACEBOOK: [FOODSCAPE COLLECTIVE](#)

At the workshop, you will get to:

- explore your perceptions of / preferences for urban nature
- understand the types of urban nature found in our city
- ask better questions (metacognitive skill)
- get to meet other participants and gardeners who're asking the same questions you are!

Register at: tiny.cc/w-workshops

Each workshop is limited to no more than 15 participants.

For enquiries, please email huiying.n@u.nus.edu
