

# Climate Actions and Sustainable Development – Where Are We Now? || Film screening, tour and dialogue at Marina Barrage

24 July 2018 || TO NUS Community

Singapore has designated 2018 to be its Year of Climate Action.

The Energy Studies Institute, partnering with the Office of Environmental Sustainability (OES) and National Youth Council (NYC), is organising an event at the Marina Barrage to take stock of climate action and sustainable development thus far. It will begin with a concurrent screening of the documentary 'Before the Flood' and a guided tour of the new Sustainable Singapore Gallery. Following which, a dialogue will convene where speakers will present the science of climate change, progress made in Singapore's Year of Climate Action and a youth perspective on the Sustainable Development Goals.

NUS will be providing complimentary one-way transport to Marina Barrage, on a first-come-first-serve basis. After registration for this event, you will be asked to indicate whether you need the transport via email. More information can be found [here](#).

An INSPIRIT Invitation
