On 9 Mar 2015, three advanced trainees in Occupational Medicine from Myanmar representing various ministries conducted a study visit to Office of Safety, Health &Environment (OSHE), NUS. The purpose of the visit was to understand NUS Safety Management System (SMS) and learning some of the good practices that can be applied upon returning to their respective organisations. During their visit, they toured the labs in Centre for Advanced 2D Materials and Graphene Research Centre to see their setup and some of the safety features in place.
